Post-Exploitation Practice

This assignment is all about hands-on practice in the Post-Exploitation Phase. I have located two great TryHackMe rooms, each focusing on a post-exploit phase that we discussed. For this assignment, select one of the rooms depending on your specific area of interest.

Instructions

Choose Your Focus: Select one of the two rooms based on your interest— Maintaining Access or Covering Tracks.

Complete the Room: Follow the instructions within the chosen room to complete the exercises. Take your time to understand each concept and practice hands-on. Use this opportunity to hone your skills in a safe environment.

Reflect: After completing the room, reflect on what you've learned. Consider the challenges you faced and how you overcame them.

Room Options

Maintaining Access (Hard)

Password Attacks
https://tryhackme.com/room/passwordattacks

This room introduces fundamental techniques to perform a successful password attack against various services and scenarios. Explore password attacking techniques, profiling, offline attacks, online password attacks, and password spray attacks. Sharpen your skills in password security assessment.

Covering Tracks (Medium)

Evading Logging and Monitoring
https://tryhackme.com/room/monitoringevasion

Learn how to bypass common logging and system monitoring, such as ETW, using modern tool-agnostic approaches. Dive into event tracing, log evasion approaches, tracing instrumentation, group policy takeover, and a real-world scenario. Enhance your understanding of evading detection in post-exploitation scenarios.

Happy hacking!
